Intelliscreen(TM) Cholesterol Metabolites Mini-Library FBM-10-7325

Article Name	Intelliscreen(TM) Cholesterol Metabolites Mini-Library
Biozol Catalog Number	FBM-10-7325
Supplier Catalog Number	10-7325
Alternative Catalog Number	FBM-10-7325-1LIBRARY
Manufacturer	Focus Biomolecules
Category	Sonstiges
Product Description	Comprises 13 biologically active cholesterol metabolites...
Form	Supplied as DMSO solution 10mM
Application Notes	Cholesterol is the primary sterol in all eukaryotes and is the precursor to bile acids, steroid hormones, vitamin D, and other important biomolecules. Many of the intermediate products of cholesterol metabolism (oxysterols) are themselves important signaling molecules involved in stem cell fate, inflammatory and immune processes, neurodegeneration and are endogenous ligands for a wide variety of cellular receptors. The Intelliscreen TM Cholesterol Metabolites Cholesterol Metabolites mini-library is a useful tool for exploring the biology of these important molecules or as a reference for monitoring their presence in biological samples.
