| Immunogen                  | A recombinant human Growth Hormone (GH) fragment (aa58-187) (exact sequence is proprietary)                                                                                                                                                                   |
| Conjugation                | CF568                                                                                                                                                                                                                                                         |
| Product Description        | Pituitary growth hormone (GH) plays a crucial role in stimulating and controlling the growth, metabolism and differentiation of many mammalian cell types by modulating the synthesis of multiple mRNA species. These effects are mediated by the binding ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.1 mg/mL                                                                                                                                                                                                                                                     |
