| Immunogen                  | KG1 acute myeloid leukemia cell line                                                                                                                                                                                                                          |
| Product Description        | This antibody recognizes a ~90-95 kDa protein which is identified as cell surface transferrin receptor (CD71), a disulfide-bonded homodimeric glycoprotein of 180-190 kDa (Workshop IV). This MAb is highly specific to CD71 and shows no cross-reaction w... |
