| Immunogen                  | Recombinant human full-length TNC protein                                                                                                                                                                                                                     |
| Product Description        | In Western blotting, this antibody reacts with two bands of ~MW of 210 kDa and 300 kDa, identified as two isoforms of Tenascin C. Specificity of this MAb is validated by sequential immunoprecipitation with a PAb against Tenascin C. Tenascin C is a mu... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.2 mg/mL                                                                                                                                                                                                                                                     |
| Clone Designation          | [TNC/3635]                                                                                                                                                                                                                                                    |
| Molecular Weight           | 210 kDa and 300 kDa                                                                                                                                                                                                                                           |
