Product Description	Prostaglandins are a diverse group of autocrine and paracrine hormones that mediate many cellular and physiologic processes. Prostaglandin H2 (PGH2) is an intermediate molecule in formation of the prostaglandins. Cyclooxygenase-1 (Cox-1) and cyclooxygenase-2 (Cox-2) are two enzymes that catalyze the conversion of arachidonic acid to PGH2. Cox-1 is constitutively expressed and involved in the regulation of normal physiologic processes. Cox-2 is induced by various stimuli and is involved in the pathophysiology of inflammatory diseases. This antibody is specific for the COX-2 protein.
