| Product Description        | Cytokeratin 8 belongs to the type B (basic) subfamily of high molecular weight keratins and exists in combination with cytokeratin 18. Cytokeratin 8 is primarily found in the non squamous epithelia and is present in majority of adenocarcinomas and du... |
| Molecular Weight           | ~ 55 kDa                                                                                                                                                                                                                                                      |
| UniProt                    | <a href="#">P05787</a>                                                                                                                                                                                                                                        |
| Purity                     | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).                                                                                                   |

|                    |                                                                                       |
|--------------------|---------------------------------------------------------------------------------------|
| Form               | Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2                |
| Application Dilute | WB 1:500 - 1:2000 IHC 1:50 - 1:200 IF 1:50 - 1:200                                    |
| Application Notes  | Cytokeratin 8 polyclonal antibody detects endogenous levels of Cytokeratin 8 protein. |
