| Immunogen                  | The antiserum was produced against synthesized peptide derived from human EGFR around the phosphorylation site of Tyr1092. AA range:1061-1110                                                                                                                 |
| Product Description        | The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal ... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
