| Immunogen                  | Synthesized phosho peptide around human VASP (Ser239)                                                                                                                                                                                                         |
| Product Description        | Vasodilator-stimulated phosphoprotein (VASP) is a member of the Ena-VASP protein family. Ena-VASP family members contain an EHV1 N-terminal domain that binds proteins containing E/DFPPPPXD/E motifs and targets Ena-VASP proteins to focal adhesions. In... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
