| Immunogen                  | The antiserum was produced against synthesized peptide derived from human Retinoic Acid Receptor beta. AA range:331-380                                                                                                                                       |
| Product Description        | This gene encodes retinoic acid receptor beta, a member of the thyroid-steroid hormone receptor superfamily of nuclear transcriptional regulators. This receptor localizes to the cytoplasm and to subnuclear compartments. It binds retinoic acid, the bi... |
