| Immunogen                  | The antiserum was produced against synthesized peptide derived from human IL-20Ralpha. AA range:173-222                                                                                                                                                       |
| Product Description        | This gene encodes a member of the type II cytokine receptor family. The encoded protein is a subunit of the receptor for interleukin 20, a cytokine that may be involved in epidermal function. The interleukin 20 receptor is a heterodimeric complex con... |
