| Category                   | Biochemikalien                                                                   |
| Application                | ELISA                                                                            |
| Conjugation                | Biotin                                                                           |
| Product Description        | Biotin is conjugated to NH2 of SAH through 6-aminohexanoic acid....              |
| Concentration              | 2 mg/ml                                                                          |
| Molecular Weight           | 723.86                                                                           |
| Buffer                     | Supplied in 20mM PBS, pH 7.4, with 0.1% Proclin and with or without 10mg/ml BSA. |
| Purity                     | 100%                                                                             |
| Form                       | Liquid                                                                           |
| Formula                    | C30H45N9O8S2                                                                     |
| Target                     | Bio-6C-SAH                                                                       |
