| Species Reactivity         | Mouse                                                                                                                                                                                                                                                   |
| Product Description        | Mouse 5-Hydroxytryptamine ELISA Kit is a competitive Enzyme-Linked Immunosorbent Assay (cELISA) designed for the in vitro quantitative determination of mouse 5-Hydroxytryptamine in serum, plasma, tissue homogenates, and other biological fluids.... |
| Range                      | 1.563-100 ng/ml                                                                                                                                                                                                                                         |
| Sensitivity                | 0.5 ng/ml                                                                                                                                                                                                                                               |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                                         |
| Target                     | 5-Hydroxytryptamine                                                                                                                                                                                                                                     |
