| Product Description        | Human Fibrillarin ELISA Kit is a sandwich Enzyme-Linked Immunosorbent Assay (sELISA) designed for the in vitro quantitative determination of human Fibrillarin in serum, plasma, tissue homogenates, and other biological fluids.... |
| Range                      | 1.563-100 ng/ml                                                                                                                                                                                                                      |
| Sensitivity                | 0.938 ng/ml                                                                                                                                                                                                                          |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                      |
| Target                     | Fibrillarin                                                                                                                                                                                                                          |
