| Product Description        | Human NFIB/NF1B2 ELISA Kit is a sandwich Enzyme-Linked Immunosorbent Assay (sELISA) designed for the in vitro quantitative determination of human NFIB/NF1B2 in tissue homogenates or other biological fluids.... |
| Range                      | 0.156-10 ng/ml                                                                                                                                                                                                    |
| Sensitivity                | 0.054 ng/ml                                                                                                                                                                                                       |
| Samples                    | Tissue homogenates or other biological fluids.                                                                                                                                                                    |
| Target                     | NFIB/NF1B2                                                                                                                                                                                                        |
