| Product Description        | This General Bovine Serum Albumin (BSA) ELISA Kit is a Competitive Inhibition ELISA assay that will detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids.... |
| Range                      | 0.122-500µg/mL                                                                                                                                                                                                                                           |
| Sensitivity                | 0.05µg/mL                                                                                                                                                                                                                                                |
| Samples                    | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids.                                                                                                                                                  |
| Application Notes          | Assay Length: 4.5 hours .Experimental Method: Competitive Inhibition                                                                                                                                                                                     |
