| Application                | ELISA                                                                                                                                                                                                                                                         |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | This Human Cholecystokinin (CCK) ELISA Kit is a precoated, Competitive Inhibition ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids... |
| Range                      | 15.625-1000pg/mL                                                                                                                                                                                                                                              |
| Sensitivity                | 4.55pg/mL                                                                                                                                                                                                                                                     |
| NCBI                       | <a href="#">25333</a>                                                                                                                                                                                                                                         |
| UniProt                    | <a href="#">P08494</a>                                                                                                                                                                                                                                        |
| Samples                    | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target                     | Human Cholecystokinin (CCK)                                                                                                                                                                                                                                   |

Application Notes

Assay Length: 4.5 hours. Experimental Method: Competitive Inhibition
