| Application                | ELISA                                                                                                                                                                                                                                                         |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | This Human Cerebral Dopamine Neurotrophic Factor (CDNF) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates and other biological fluids . This product is... |
| Range                      | 0.156-10ng/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 0.057ng/mL                                                                                                                                                                                                                                                    |
