| Product Description        | This Human Sex Determining Region Y Box Protein 9 (SOX9) ELISA Kit is a Sandwich ELISA assay that will detect and quantify the target analyte in tissue homogenates, cell lysates and other biological fluids.... |
| Range                      | 0.312-20ng/mL                                                                                                                                                                                                     |
| Sensitivity                | 0.113ng/mL                                                                                                                                                                                                        |
| NCBI                       | <a href="#">84152</a>                                                                                                                                                                                             |
| UniProt                    | <a href="#">Q9UD71</a>                                                                                                                                                                                            |
| Samples                    | tissue homogenates, cell lysates and other biological fluids.                                                                                                                                                     |
| Application Notes          | Assay Length: 4.5 hours .Experimental Method: Sandwich                                                                                                                                                            |
