| Product Description        | This gene encodes a membrane-bound adenylate cyclase that catalyses the formation of cyclic AMP from ATP and is inhibitable by calcium. The product of this gene is a member of the adenylyl cyclase class-4/guanylyl cyclase enzyme family that is charac... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
