| Conjugation                | Unconjugated                                                                                                                                                                                                                                                                |
| Product Description        | cyclin dependent kinase 8(CDK8) Homo sapiens The protein encoded by this gene is a member of the cyclin-dependent protein kinase (CDK) family. CDK family members are highly similar to the gene products of <i>Saccharomyces cerevisiae</i> cdc28, and <i>Schizosac...</i> |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                                  |
| Molecular Weight           | 53kDa                                                                                                                                                                                                                                                                       |
