| Species Reactivity         | Human                                                                                                                                                                                                                                                                              |
| Product Description        | Platelet-Derived Growth Factor Receptor beta (PDGFR-beta) is a member of the protein kinase superfamily and CSF-1/PDGF receptor subfamily. The PDGF family consists of PDGF-A, -B, -C and -D, which form either homo- or heterodimers (PDGF-AA, -AB, -BB, ...                      |
| Molecular Weight           | 57.17 KDa                                                                                                                                                                                                                                                                          |
| NCBI                       | <a href="#">32224</a>                                                                                                                                                                                                                                                              |
| Purity                     | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Application Notes          | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
