| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Investigate compartmentalized cAMP signaling dynamics in living cells. This genetically encoded biosensor is a fusion of the AKAP18a protein and the cADDis sensor. As localized intracellular cAMP levels rise, the sensor increases in green fluorescenc... |
