| Product Description        | GPR34 receptor antagonist 3 (Compound 5e) is a class of GRP34 antagonists, IC50 is 0.680 µM. GPR34 receptor antagonist 3 inhibited ERK1/2 phosphorylation induced by lysophosphatidylserine in a dose-dependent way without obvious cytotoxicity. GPR34 re... |
| Molecular Weight           | 515.98                                                                                                                                                                                                                                                        |
| Purity                     | 99.88                                                                                                                                                                                                                                                         |
| Formula                    | C30H26ClNO5                                                                                                                                                                                                                                                   |
| Target                     | ERK,Orphan GPCR,Orphan Receptor                                                                                                                                                                                                                               |
| Application Notes          | MCE Product type: Reference compound                                                                                                                                                                                                                          |
