| Manufacturer               | MedchemExpress                                                                                                                                                                                                                                                |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | B2M is a component of MHC class I complexes that present peptide antigens to the immune system. HLA-A*0201 HPV16 E7 complex Protein, Human (YMLDLQPET, HEK293, His) is a recombinant protein dimer complex containing human-derived HLA-A*0201 HPV16 E7 co... |
| Molecular Weight           | 55-60 kDa                                                                                                                                                                                                                                                     |
| Purity                     | 95                                                                                                                                                                                                                                                            |
| Formula                    | 3105&567(Gene_ID)P01892 (G25-I308)&P61769 (I21-M119)&YMLDLQPET(Accession)                                                                                                                                                                                     |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
