| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Interleukin-25 (IL-25), also known as IL-17E, belongs to the IL-17 cytokine family. IL-25 activates NF-kappaB, MAPKs and JAK/STAT signaling pathways[1]. IL-25 exerts singal transduction through receptors composed of IL17RA and IL17RB[7]. IL-25/IL-17E... |
| Molecular Weight           | Approximately 30-35 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                               |
| Purity                     | 95.30                                                                                                                                                                                                                                                         |
| Formula                    | 140806(Gene_ID)Q8VHH8 (V17-A169)(Accession)                                                                                                                                                                                                                   |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
