| Manufacturer               | MedchemExpress                                                                                                                                                                                                                   |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                 |
| Product Description        | IGFBP2 Protein, Human (HEK293, His) is a member of the family of high-affinity binding proteins (IGFBP1-6) and appears to play a governing role in Insulin-like Growth Factor (IGF) regulation in the central nervous system.... |
| Molecular Weight           | Approximately 33-35 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                  |
| Purity                     | 97.83                                                                                                                                                                                                                            |
| Formula                    | 3485(Gene_ID)P18065 (F40-Q325)(Accession)                                                                                                                                                                                        |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                           |
