| Product Description        | PIP5K1B participates in the biosynthesis of PI(4,5)P2. PIP5K1B is at the crossroad of different signaling pathways, mediating RAC1-dependent reorganization of actin filaments and contributing to the activation of phospholipase D2. PIP5K1B Recombinant... |
| Target                     | Biochemical Assay Reagents                                                                                                                                                                                                                                    |
| Application Notes          | MCE Product type: Enzyme                                                                                                                                                                                                                                      |
