| Category                   | Kits/Assays                                                                                    |
| Product Description        | Palladium (II) acetate is a catalyst that catalyzes aromatic substitution reactions[1]....     |
| Molecular Weight           | 224.51                                                                                         |
| Purity                     | 99.90                                                                                          |
| CAS Number                 | [3375-31-3]                                                                                    |
| Formula                    | $\text{Pd}(\text{OCOCH}_3)_2$                                                                  |
| Target                     | Biochemical Assay Reagents                                                                     |
| Application Notes          | MCE Product type: Biochemical Assay Reagents                                                   |
