| Category                   | Biochemikalien                                                                                           |
| Product Description        | 5-Fluorocytidine is a member of cytidines, inhibits maturation of the 45S ribosomal RNA precursor[1].... |
| Molecular Weight           | 261.21                                                                                                   |
| Purity                     | 99.99                                                                                                    |
| CAS Number                 | [2341-22-2]                                                                                              |
| Formula                    | C9H12FN3O5                                                                                               |
| Target                     | DNA/RNA Synthesis                                                                                        |
| Application Notes          | MCE Product type: Reference compound                                                                     |
