| Category                   | Biochemikalien                                                                                                                                                    |
| Product Description        | 24RBPYBC is a dinucleating macrocyclic ligand, it contains phenolate pyridine, bipyridine, and amino groups form dinuclear Fe(II) and Fe(III) complexes[1][2].... |
| Molecular Weight           | 538.68                                                                                                                                                            |
| CAS Number                 | [185675-92-7]                                                                                                                                                     |
| Formula                    | C32H38N6O2                                                                                                                                                        |
| Target                     | Biochemical Assay Reagents                                                                                                                                        |
| Application Notes          | MCE Product type: Reference compound                                                                                                                              |
