| Category                   | Biochemikalien                                                                                                                                                                                                                                       |
| Product Description        | PAA5 is a methide carbon-centered polynuclear Au(I) cluster. PAA5 can release Au(I) causing Pro-oxidant response and accelerated ferroptosis. PAA5 increases the expression of pH2AX in a time-dependent manner. PAA5 has anticancer activity[1].... |
| Molecular Weight           | 1348.66                                                                                                                                                                                                                                              |
| Formula                    | C14H8Au5B2F8N                                                                                                                                                                                                                                        |
| Target                     | Endogenous Metabolite,Ferroptosis,Reactive Oxygen Species (ROS)                                                                                                                                                                                      |
| Application Notes          | MCE Product type: Reference compound                                                                                                                                                                                                                 |
