| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | N1-Methyl-arabinoadenosine is a purine nucleoside analog. Purine nucleoside analogs have broad antitumor activity targeting indolent lymphoid malignancies. Anticancer mechanisms in this process rely on inhibition of DNA synthesis, induction of apopto... |
| Molecular Weight           | 281.27                                                                                                                                                                                                                                                        |
| CAS Number                 | [685880-77-7]                                                                                                                                                                                                                                                 |
| Formula                    | C11H15N5O4                                                                                                                                                                                                                                                    |
| Target                     | Nucleoside Antimetabolite/Analog                                                                                                                                                                                                                              |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
