| Product Description        | 6-Mthoxy-9-beta-D-(2-C-ethynyl-ribofuranosyl) purine is a purine nucleoside analog. Purine nucleoside analogs have broad antitumor activity targeting indolent lymphoid malignancies. Anticancer mechanisms in this process rely on inhibition of DNA synt... |
| Molecular Weight           | 306.27                                                                                                                                                                                                                                                        |
| Formula                    | C13H14N4O5                                                                                                                                                                                                                                                    |
| Target                     | Nucleoside Antimetabolite/Analog                                                                                                                                                                                                                              |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
