| Product Description        | 5-[[Methyl(2,2,2-trifluoroacetyl)amino]methyl]-2-thiouridine is a purine nucleoside analogue. Purine nucleoside analogs have broad antitumor activity targeting indolent lymphoid malignancies. Anticancer mechanisms in this process rely on inhibition o... |
| Molecular Weight           | 399.34                                                                                                                                                                                                                                                        |
