| Category                   | Kits/Assays                                                                                                                                             |
| Product Description        | Ionizable lipid-1 (compound II-10) is an ionizable lipid (pKa=6.16) that can be used to prepare lipid nanoparticles (LNP) with bilayer structure[1].... |
| Molecular Weight           | 956.00                                                                                                                                                  |
| Formula                    | C58H115ClN2O5                                                                                                                                           |
| Target                     | Liposome                                                                                                                                                |
| Application Notes          | MCE Product type: Biochemical Assay Reagents                                                                                                            |
