| Category                   | Biochemikalien                                                                                                                                                                                                               |
| Product Description        | mCP-BP-SFAC is a luminogenic molecule. mCP-BP-SFAC exhibits strong sky-blue delayed fluorescence in neat films, with photoluminescence (PL) peaks at ~483 nm and delayed fluorescence lifetimes of 5.4 to 5.7 $\mu$ s[1].... |
| Molecular Weight           | 841.99                                                                                                                                                                                                                       |
| Formula                    | C62H39N3O                                                                                                                                                                                                                    |
| Target                     | Fluorescent Dye                                                                                                                                                                                                              |
| Application Notes          | MCE Product type: Dye Reagents                                                                                                                                                                                               |
