| Category                   | Biochemikalien                                                                                                                                          |
| Product Description        | JFX650 is a red fluorescent deuterated dye with a maximum excitation emission wavelength of 650/667 nm. JFX650 is suitable for live cell imaging[1].... |
| Molecular Weight           | 637.85                                                                                                                                                  |
| CAS Number                 | [2396479-84-6]                                                                                                                                          |
| Formula                    | C35H19D16N3O6Si                                                                                                                                         |
| Target                     | Fluorescent Dye                                                                                                                                         |
| Application Notes          | MCE Product type: Isotope-Labeled Compounds                                                                                                             |
