| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | IFN-alpha/beta R2 protein and IFNAR1 together constitute the heterodimeric receptor of type I interferon and initiate the JAK-STAT signaling cascade. Upon binding of type I interferons, IFNAR1 and IFNAR2 activate related Janus kinases (TYK2 and JAK1)... |
| Molecular Weight           | Approximately 50-70 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                               |
| Formula                    | 15976(Gene_ID)O35664-1 (S22-A242)(Accession)                                                                                                                                                                                                                  |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
