| Product Description        | Influenza virus nucleoprotein (NP) is a structural protein that coats viral negative-strand RNA. NP proteins protect viral RNA from degradation by cellular enzymes during the viral life cycle, fit the helical structure of RNP, regulate transcription a... |
| Molecular Weight           | Approximately 63.1 kDa                                                                                                                                                                                                                                         |
| Formula                    | /(Gene_ID)ACF54251 (M1-Y560)(Accession)                                                                                                                                                                                                                        |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                         |
