| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The hemagglutinin HA1 protein is essential for attachment of virions to host cells by binding to sialic acid-containing receptors, inducing virion internalization via clathrin-dependent or clathrin- and caveolin-independent pathways.As a class I vira... |
| Molecular Weight           | Approximately 36.7 kDa                                                                                                                                                                                                                                        |
| Formula                    | /(Gene_ID)ACA25329 (D19-R342)(Accession)                                                                                                                                                                                                                      |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
