| Category                   | Proteine/Peptide                                                                                                                                                                                                                                                |
| Product Description        | The HA/hemagglutinin protein binds to sialic acid receptors, initiating viral attachment to cells. Internalization occurs via clathrin-dependent or -independent pathways. HA/Hemagglutinin Protein, H5N1 (G2U0T8, HEK293, His) is the recombinant Virus-der... |
| Molecular Weight           | Approximately 65-70 kDa, based on SDS-PAGE under reducing conditions, 25 kDa & 40 kDa & 70 kDa, based on SDS-PAGE under non-reduced conditions, due to the glycosylation.                                                                                       |
| Formula                    | /(Gene_ID)G2U0T8 (D17-Q530)(Accession)                                                                                                                                                                                                                          |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                          |
