| Category                   | Proteine/Peptide                                                                                                                                                                                                                                               |
| Product Description        | The hemagglutinin (HA) protein attaches viral particles to host cells by binding to sialic acid-containing receptors and induces viral particle internalization through clathrin-dependent endocytosis. HA also promotes an alternative clathrin- and caveo... |
| Molecular Weight           | Approximately 59.6 kDa                                                                                                                                                                                                                                         |
| Formula                    | /(Gene_ID)ABR10842 (S16-S525)(Accession)                                                                                                                                                                                                                       |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                         |
