| Product Description        | OX40 (TNFRSF4), is a receptor for OX40 Ligand. OX40 is preferentially expressed by T cells. OX40 can be activated by OX40 Ligand, thereby functioning as a T cell co-stimulatory molecule. The OX40-OX40 Ligand interaction promotes effector T-cell survi... |
| Molecular Weight           | Approximately 47 kDa                                                                                                                                                                                                                                          |
