| Manufacturer               | MedchemExpress                                                                                                                                                                                                                                                |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | NRBF2 protein may regulate transcriptional activation through target nuclear receptors and act as a transcriptional activator in vitro. It participates in starvation-induced autophagy, binding to PI3K complex I (PI3KC3-C1) and stabilizing its assembl... |
| Molecular Weight           | Approximately 61 kDa, based on SDS-PAGE under reducing conditions.                                                                                                                                                                                            |
| Formula                    | 29982(Gene_ID)Q96F24-1 (M1-N287)(Accession)                                                                                                                                                                                                                   |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
