| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The SARS-Cov-2 S glycoprotein is a SARS-Cov-2 S glycoprotein. The amino acid sequence 1261-1267a.a of the SARS-Cov-2 S glycoprotein is transmembrane. The SARS-Cov-2 S glycoprotein is a highly glycosylated trimer, each of which consists of 1260 amino ... |
| Molecular Weight           | Approximately 35.7 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                                |
| Formula                    | 43740568(Gene_ID)YP_009724390 (R319-F541, F486S)(Accession)                                                                                                                                                                                                   |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
