| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The FGFR-4 protein is a cell surface receptor for tyrosine kinase and fibroblast growth factor. FGFR4, a receptor for FGF-1 and FGF-3 highly expressed in cancer cells, promotes tumor progression in colon cancer by activating Mek/Erk and MMP-7. FGFR-4... |
| Molecular Weight           | Approximately 65.6 kDa.                                                                                                                                                                                                                                       |
| Formula                    | 698494(Gene_ID)XP_001087243.1 (L22-D369)(Accession)                                                                                                                                                                                                           |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
