| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The hemagglutinin (HA) protein attaches viral particles to host cells by binding to sialic acid-containing receptors and induces viral particle internalization through clathrin-dependent endocytosis. HA also promotes an alternative clathrin- and cave... |
| Molecular Weight           | Approximately 61.9 kDa.                                                                                                                                                                                                                                       |
| Formula                    | /(Gene_ID)ACS71642 (Q17-I566)(Accession)                                                                                                                                                                                                                      |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
