| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Syntaxin-BP1 protein critically regulates synaptic vesicle docking and fusion, binds GTP-binding proteins and ensures efficient neurotransmission. It interacts with syntaxin in a 1:1 ratio and shows specificity for syntaxin 1, 2, and 3 (excluding syn... |
| Molecular Weight           | Approximately 80 kDa, based on SDS-PAGE under reducing conditions.                                                                                                                                                                                            |
| Formula                    | 6812(Gene_ID)P61764 (M1-S594)(Accession)                                                                                                                                                                                                                      |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
