| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The LILRB1/CD85j/ILT2 protein is a receptor for class I MHC antigens and recognizes multiple HLA alleles and H301/UL18 (human cytomegalovirus MHC homolog). Ligand binding induces inhibitory signals that downregulate immune responses. LILRB1/CD85j/ILT... |
| Molecular Weight           | Approximately 55-68 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                               |
| Formula                    | 10859(Gene_ID)Q8NHL6-1 (L116-V461)(Accession)                                                                                                                                                                                                                 |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
