| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Source : The E.coli derived recombinant protein contains the HCV NS3 immunodominant regions, amino acids 1356-1459. The protein is fused to a GST tag at N-Terminus. HCV is a small 50nm, enveloped, single-stranded, positive sense RNAvirus in the famil... |
| Purity                     | HCV NS3 Genotype-6 protein is >95% pure as determined by 10% PAGE (coomassie staining).                                                                                                                                                                       |
